

Record of Allied Health training – education provider supervisors

Staff name	
Course / Profession	
Educational Institution	

Copies of this signed record and associated documentation must be retained by Education Provider Supervisors and presented to the Hospital and Health Service if requested.

Education Provider Supervisors must complete and maintain currency of mandatory requirements prior to supervising students on Queensland Health Placements. You will not be able to commence supervision of Allied Health students within Queensland Health until mandatory requirements are completed.

Please read the [‘Allied Health clinical placement training: A guide for education provider staff’](#) for further instructions on mandatory clinical placement requirements.

Student Placement Deed mandatory clinical placement requirements

You must complete all Queensland Health clinical placement requirements as detailed on the [Queensland Health Clinical Placements](#) website before supervising a student on placement within a Queensland Health facility.

Refer to the Clinical Placement webpages for more information:

- [Education provider information](#)
- [Organising and administering student placements](#)
 - Supervisor Deed Poll

Allied Health clinical placement training

The following training must also be completed by all education provider staff supervising Allied Health students in addition to the Student Deed requirements described above and detailed on the clinical placement’s website. For more information, please refer to the [Allied health placement information for education providers](#) website.

Training to be completed PRIOR to commencing supervision of students

The training listed below is to be completed by Education Provider Supervisors prior to supervising students on Queensland Health placements.

Please read the [‘Allied Health clinical placement training: A guide for education provider staff’](#) for further instructions.
