

Network education program

In addition to educational support provided to network trainees through their hospital or rotation, the network offers a comprehensive education program to support trainees through their written and clinical examinations.

Written examination preparation program

The program for written exam preparation includes:

- a series of written exam preparation program session recordings on specialised topics
- written exam boot camps with paediatric specialists delivering Q&A sessions across key subspecialty areas
- an **online practice MCQ exam** for exam candidates to assess how they are progressing with their preparation for the written exam, practice their exam technique and timekeeping and gain exposure to a diverse range of topics. Held for both February and October exam candidates.

Clinical examination preparation program

- The **Paediatric Clinical Examination Preparation Program (PCEPP)** includes a weekend course which provide participants with a framework for effective exam preparation and offers broad exposure to clinical exam subspecialties and practical advice from topic experts.
- Long case practice with national examiners

Wellness Resources

- Online wellbeing education and training programs available for junior doctors
- Performance psychology sessions for network trainees preparing for exams

Online learning platforms

Resources will be available to network trainees on MS Teams and iLearn—a Queensland Health supported online learning platform.

These platforms include links to resources as well as access to recorded presentations, the Paediatric Clinical Examination Preparation Program (only available to registered course participants) and the online practice MCQ exam (available to network written exam candidates).

Feedback

Trainees are encouraged to provide feedback on their network placement and training experience. Feedback can be left at any time via this [survey link](#).
