## Caboolture Hospital

<b>Hospital information and highlights</b>	Caboolture Hospital serves a population of around 155,000. We are halfway between Brisbane and the Sunshine Coast, located in an area of rapid growth. Caboolture Hospital has a busy Paediatric service as it deals with a growing community with highly variable social demographics. We have more than 12,500 paediatric presentations in emergency department per year and over 3000 admissions to the ward and paediatric short stay unit. This provides great learning opportunity for trainees in the field of general paediatrics well supported by senior staff, education, and quality improvement activities in the department.
<b>Service type</b> (inpatient/outpatient/community)	Inpatient and Paediatric Short Stay services Neonatal Unit General Paediatric clinics Child Protection Clinic, Diabetic and Endocrine clinics, Paediatric Respiratory clinics.
<b>No. of beds</b> <b>Annual paediatric admissions</b>	12 General Paediatric beds and 5 Paediatric Short Stay beds, 12 Special Care beds (expanding to 17) The Paediatric Unit cares for around 4,000 children and infants each year under the age of 16 Special Care Nursery admissions around 375 babies per year
<b>No of births</b> (if applicable)	2,000 births/year. Infants above 32 weeks of gestation are cared for in our SCN. We offer CPAP and commence ventilation/surfactant if required.
<b>RACP accreditation</b> Please refer to the RACP website for up to date accreditation status	Advanced Training: Maximum of 12 month of core training Secondment Hospital for Paediatric Basic Training (Maximum 12 months rotation from primary hospital) Accredited to February 2026 for basic training and August 2027 for advanced training
<b>Potential rotations</b>	General Paediatrics Special Care Nursery Outpatient Clinics
<b>Staffing and supervision</b>	Director of Paediatrics 8 Paediatricians comprising 6 FTE including Director Sub-specialists in Paediatric Endocrine and Respiratory medicine 9 registrars or PHOs
<b>Teaching and learning</b>	Weekly paediatric grand rounds Daily Consultant led rounds Twice weekly structured teaching for Registrars and PHOs Monthly Radiology meeting

	<p>Mandatory advanced neonatal resuscitation programme and Neonatal Stabilisation courses</p> <p>Monthly Paediatric Morbidity and Mortality meetings</p> <p>Three Monthly Perinatal Morbidity and Mortality meetings</p> <p>Protected time for quality improvement including Audits/ research</p> <p>Trainees close to obtaining fellowship can be offered to participate in after hour on calls, backed up by the consultants.</p>						
<b>Profile of work</b>	<p>Coverage roster – rotating roster</p> <p>Ward responsibilities</p> <p>Outpatient Clinics and attendance in child protection meetings</p> <p>Participation in Multidisciplinary team meetings.</p> <p>Specialist clinic coverage – General Paediatrics, Endocrine Clinic, Respiratory Clinic, Child Protection</p> <p>Research/presentations – Opportunity to participate in hospital grand rounds, support available from research associate</p> <p>Teaching responsibilities – Formal weekly RMO teaching, Intern/RMO supervision, Year 4 medical students</p>

## Cairns Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Cairns and Hinterland Hospital and Health Service Paediatric department has the responsibility of providing public hospital and community services to a population of approximately 67,000 children and young people. The primary catchment of the CHHHS covers an area of 142,900 km<sup>2</sup> from Tully in the south, Cow Bay in the north and Croydon in the west. The outer western region of our Service encompasses extremely remote communities. The paediatric department also supports the acute provision of care to children in the Torres and Cape HHS to the North as well as a number from PNG.</p> <p>Close to 93% of our paediatric work is managed locally and there is excellent support from our local adult ICU for severely unwell children who are then managed in conjunction with/transferred to our regional Paediatric ICU in Townsville Hospital.</p> <p>We manage a very wide range of conditions including all those commonly seen in all metropolitan areas but also a significant number of tropical diseases along with problems related to socio-economic disadvantage. Considering our population's demographics and as the primary referral centre for TCHHS to the North of us, a substantial proportion of our work is with children and families who identify as Aboriginal and/or Torres Strait Islander - as such we are very focused on culturally appropriate indigenous healthcare.</p> <p>We provide local sub-specialist services in paediatric cardiology, endocrinology and diabetes, paediatric allergy and rheumatology along with paediatric oncology services for the region in partnership with the Queensland Paediatric Haematology Oncology Network.</p> <p>We have strong established links with the Queensland Children's Hospital in Brisbane and host visiting sub-specialist clinics from respiratory/CF and sleep medicine, genetics, haematology, oncology and metabolic medicine along with a paediatric surgical outpatient service from Townsville Hospital.</p> <p>The unit is committed to providing consistent and high-quality supervision to all our trainees, ensuring professional development along with utilisation of learning opportunities and consultant support.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services paediatric medical services Outreach programmes and Community Development Services Paediatric endocrinology, cardiology, allergy subspecialist clinics Level 5 SCN</p>
<p><b>No. of beds</b></p>	<p>16 bed paediatric ward (flexing to 22 beds) with a separate 8 bed adolescent unit 22 funded SCN cot spaces</p>
<p><b>Annual paediatric admissions</b></p>	<p>There are about 6000 separations each year with the majority of work being acute (~80%). There are ~30,000 children who present to ED per annum.</p>

<b>No of births</b> (if applicable)	Approximately 3,000 per annum						
<b>RACP accreditation</b> Please refer to the RACP website for up to date accreditation status	<p>Maximum of 12 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ General Paediatrics (Rural) – with a perinatal component</li> <li>○ For 12 months training the options are: <ul style="list-style-type: none"> <li>● 12 months GP</li> <li>● 6 months GP and 6 months CD</li> </ul> </li> <li>○ For 6 months training <ul style="list-style-type: none"> <li>● 6 months of GP only</li> </ul> </li> </ul> <p>Accredited to February 2027</p>						
<b>Potential rotations</b> (depending on availability)	<p>General Paediatrics</p> <p><i>Not all these positions are fixed for advanced trainees in general paediatrics but can be organised by prior arrangement. Other options are possible depending upon trainee requirements and available positions.</i></p>						
<b>Staffing and supervision</b>	<p>Director of Paediatrics</p> <p>Paediatricians (n=10, 8.4FTE including Director)</p> <p>Sub-specialists in paediatric cardiology, endocrinology and neonatology</p>						
<b>Teaching and learning</b>	<p>Weekly registrar/PHO teaching, Paediatric X-ray meeting (protected)</p> <p>Fortnightly simulation training in SCN and paediatrics (protected)</p> <p>Weekly QCH telehealth Grand Rounds,</p> <p>Daily consultant ward rounds</p> <p>Morbidity and mortality meetings for SCN/Paediatrics (including interdepartmental)</p>						
<b>Profile of work</b>	<p>Full shift roster (1:4 weekends)</p> <p>Ward or nursery responsibilities</p> <p>Clinic coverage</p> <p>Research, clinical governance and presentations</p> <p>Teaching responsibilities (unit, peer and junior staff)</p>

## Institute for Urban Indigenous Health (IUIH)

### Who we are at IUIH

The Institute for Urban Indigenous Health (IUIH) is a large regional, networked Aboriginal Community Controlled Health Service (ACCHS), coordinating the development, planning and delivery of comprehensive health care for Aboriginal and Torres Strait Islander people living in Southeast Queensland. The IUIH Network collectively provides services to over 50,000 Aboriginal and Torres Strait Islander people each year, through 20 clinics each delivering a wide range of primary and secondary care services all under one roof.

The IUIH Paediatric Services Team includes a multidisciplinary collaboration of Specialist and Allied health providers, including Paediatricians, Paediatric Nurse Coordinators, Speech Therapists, Occupational Therapists, and Child and Family Psychologists.

The Paediatric Registrar training program holds a highly valued place in IUIH, contributing to the provision of holistic care for children and young people, and supporting the growth and development of a workforce skilled and knowledgeable in provision of care for our communities.

The opportunity personally for the Paediatric Registrar in this context is not only to build essential advanced skills in community-based specialist Paediatric assessment, diagnosis, care planning, treatment and follow up – but also to develop and expand understanding of ways of working with Aboriginal and Torres Strait Islander children and families; to experience a broader system of care designed to address key social determinants of health that impact on children and families; and actively participating in the invaluable learning experience of Multidisciplinary Team assessment clinics.

What our current registrars have to say about working at IUIH:

“Working for IUIH has been highly rewarding and provides a breadth of experience. There are various clinical sites across Brisbane, and there is a high amount of flexibility with regards to working at various clinics. IUIH provides you the opportunity to continue to develop skills in providing culturally appropriate healthcare and the opportunity to learn from both patients and staff is invaluable. Orientation is provided which can then be a platform to continue to build your skills and knowledge. IUIH is inclusive, adaptive, and there is a great amount of support within the organisation. There is always someone who is able to assist you if ever required, providing a great collaborative environment. Furthermore, the service is constantly expanding, which allows the ability to be involved with a variety of exciting growth opportunities. There is scope to be involved with research and work alongside a variety of different specialties and primary healthcare providers.”

"The paediatric advanced trainee position with IUIH has been a wonderful experience. I have been well supported by senior paediatricians, paediatric nurses and allied health staff, with exposure to a range of common and complex, behavioural and developmental problems. This is giving me the knowledge and skills I need to work independently as a general paediatrician in community, with insight into how to diagnose and manage patients in a culturally safe environment. I would recommend this role for any trainee wanting to learn and grow in a supportive but challenging clinical context."

<b>Service type (inpatient/outpatient/community)</b>	Community Controlled Health Service	
<b>RACP accreditation</b> Please refer to the RACP website for up to date accreditation status	6 months Community Developmental	
<b>Clinical Opportunities</b>	<p>Clinic twice a fortnight where a registrar can see their own patients with supervision and follow them up throughout the year. The registrar will have their own independent clinic calendar, unlike hospital out-patient's clinics, where there is often the expectation that they might be called away to other duties. Sufficient supervision time will be set aside for completion of case based discussions and mini CEXs. Registrars will also participate in Multidisciplinary Team Assessments once a fortnight along with a psychologist, nurse, speech pathologist and occupational therapist.</p> <p>A project will be completed over the course of the year with two admin days per fortnight allocated to working on this.</p>	
<b>Staffing and supervision</b>	Rosters will be built around having adequate face to face time with primary and secondary supervisor.	
<b>Teaching and learning</b>	<p>Fortnightly 1 hour education session with the paediatricians (inc. journal club).</p> <p>Half day planning meeting once a month.</p>	
<b>Profile of work</b>	Assessing and managing children from infancy to age 16 years old and working with children. Some scope for project work to involve service development if this is of interest	
<b>IUIH web link</b>	<a href="https://www.iuih.org.au/">https://www.iuih.org.au/</a>	
<b>IUIH contact</b>	Name: Alana Turnbull Tel: 0438 191 736 Email: <a href="mailto:Alana.Turnbull@iuih.org.au">Alana.Turnbull@iuih.org.au</a>	

# Ipswich Hospital

<b>Hospital information and highlights</b>	<p>Ipswich region covers Ipswich Hospital and four small rural hospitals (Boonah, Esk, Gatton and Laidley) where children are seen. The population in the region is approx. 325,000 and is the most rapidly growing area in the state with population projected to grow 51% by 2026.</p> <p>Ipswich Hospital has a separate paediatric emergency unit, ED short stay unit and waiting room, dedicated paediatric inpatient unit, Lv4 Special Care Nursery and Child Protection Unit.</p> <p>The volume and scope of patients makes for an excellent general paediatric experience for both inpatient and outpatient care.</p>
<b>Service type</b> (inpatient/outpatient/community)	<p>General Paediatric clinics</p> <p>Paediatric Endocrinology and Diabetes.</p> <p>Child Protection clinics.</p> <p>Paediatric Inpatient Unit</p> <p>Special Care Nursery</p> <p>Paediatric Emergency Department</p>

## Mount Isa Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Mount Isa Hospital (MIH) provides a robust paediatric service which is unique because of its remoteness. The Modified Monash Score for Mount Isa is 6 (as a measure of remoteness) and 7 for most of the communities served by the NWHHS. The hospital provides generalist paediatric services with visiting paediatric sub-specialities of paediatric cardiology, respiratory medicine, paediatric orthopaedics, paediatric rehabilitation and telehealth clinic services in paediatric endocrinology, child development and surgery.</p> <p>The Townsville University Hospital is a major receiving hospital and medical consultation is available 24 hours a day in areas of paediatric intensive care and neonatal medicine. Support is also provided as necessary through various services at Queensland Children's Hospital (QCH) in Brisbane.</p> <p>The catchment population served by the NWHHS (MIH) is approximately 33,000 with 23.1% identifying as indigenous. The population median age is 31 years, with children under 14 years representing 22.9% of the population. A significant proportion of the paediatric workload (~80%) involves care of indigenous children.</p>

# Redcliffe Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Redcliffe Hospital Paediatric Unit is a busy service, managing approximately 2,500 separations per year with an average length of patient stay of approximately 1 day. The Paediatric Unit is made up of multiple outpatient clinics, a children's ward and a special care nursery (SCN).</p> <p>Moderately sick neonates are cared for in the SCN, a level 4 nursery equipped with 10 cots and facilities to undertake continuous positive airway pressure for infants greater than 1,500 grams and/or 32 weeks gestation as well as short term assisted ventilation for infants prior to their transfer. Neonates requiring intensive care are stabilised in the SCN prior to transfer to the Royal Brisbane and Women's Hospital (RBWH).</p> <p>The children's ward at Redcliffe Hospital is funded for 14 beds (with 16 beds physically present). Medical and surgical patients are admitted to the children's ward. Selected orthopaedic cases are currently managed at Redcliffe hospital.</p> <p>The Paediatric Unit sees a broad mix of inpatient and outpatient general paediatric conditions. Most paediatric admissions are for the management of acute illness and hospital stay is very short, usually less than 2 days. Inpatients are predominantly of preschool age, with the most common diagnoses being bronchiolitis, chest infection (including pneumonia), urinary tract infection, gastroenteritis and other viral infections. Serious bacterial infections such as meningitis may also be managed. Young children with feeding and growth problems are often admitted. Endocrine conditions including diabetes mellitus as well as neurological conditions such as epilepsy and developmental delay are seen less frequently.</p>
<p><b>Service type</b></p>	<p>Inpatient, outpatient and community</p>
<p><b>No. of beds</b> <b>Annual paediatric admissions</b></p>	<p>14 paediatric beds and 10 neonatal beds 2,291</p>
<p><b>No of births</b> (if applicable)</p>	<p>Approximately 1,700 per annum</p>
<p><b>RACP accreditation</b> Please refer to the RACP website for up to date accreditation status</p>	<p>Maximum of 12 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ General paediatrics with perinatal component</li> </ul> <p>Accredited to 2024</p>

## Redland Hospital

<b>Hospital</b>	Bayside Health Services Redland Hospital, Cleveland, Qld and Wynnum-Manly Community Health Centre, Gundu Pa, Qld
<b>Hospital information and highlights</b>	<p>Redland Hospital is a non-tertiary district hospital located in the Bayside suburb of Cleveland in outer Metropolitan Brisbane. It services a population of over 150,000 people. The Paediatric Department at Redland Hospital looks after a divergent community with a wide range of patients. Our services include a Paediatric Emergency Department seeing nearly 16,000 paediatric patients annually, inpatient children's ward with short stay unit, a level 4 Special care Nursery, busy birth service and outpatients. We also care for children and family's resident on the Islands of the Moreton Bay being North Stradbroke, Macleay, Russell, Lamb and Coochiemudlo which are classified as remote and rural. The Islands have a large aboriginal and Torres strait islander community, a significant proportion of the community is at risk with lower socioeconomic status with child development needs. We are involved in the holistic management of children with acute and chronic neonatal and paediatric conditions. Clients may access the service from birth to the completion of high school.</p> <p>Wynnum-Manly Community Health Centre, Gundu Pa is the new state-of-the-art outreach public health facility located 15km from Redland Hospital. A range of services are available under one roof, including a 24-hour Primary Care Centre, Addiction and Mental Health, Allied Health, Child Development, Chronic Disease, Oral Health and Specialist Outpatients. The 24-hour Primary Care Centre us a walk-in service and designed to treat less urgent/minor injuries and illnesses.</p> <p>We also provide acute care services to newborn babies born at the Redland Mater Private Hospital which is located on the campus.</p>
<b>Service type</b> (inpatient/outpatient/community)	<p>Inpatient and outpatient services:</p> <p>Day Case: Rheumatology, Endocrine Testing, Gastrostomy, Haematology/Oncology</p> <p>Paediatric emergency services</p> <p>Outreach community health clinics</p> <p>General Paediatric Clinics, Neonatal follow-up clinics, Growth and Developmental Clinics, Diabetes Clinic, Surgical Clinics, Dental Lists</p> <p>Level 4 Neonatal Service</p>
<b>No. of beds</b> <b>Annual paediatric admissions</b>	<p>General Paediatric Beds: capacity 12, including 4 short stay beds</p> <p>SCN Beds: 10 with 2 emergency admission cots</p> <p>Annual Paediatric Admissions: 2200</p>
<b>No of births</b> (if applicable)	<p>Redland Hospital: approximately 2,000 births</p> <p>Mater Private Hospital Redland: approximately 340 births</p>

<p><b>Profile of work</b></p>	<p>The Paediatric training program at Redland Hospital is accredited by the RACP in General Paediatrics for both basic and advanced training. Redlands is also accredited for Advanced Community placement but is awaiting funding for a position.</p> <p>It is also accredited by RACGP for Queensland Rural Specialist and Generalist Pathway in Paediatrics.</p> <p>It is also recognised by University of Queensland School of Medicine for Undergraduate Medical student's rotation in paediatrics.</p> <p>Our Paediatric Department has 3 advanced trainees and 3 basic trainees in general paediatrics; in addition, we have 3 Principal House Officers, 1 JHO/SHO, 1 Intern and rotating ED Doctor</p> <p>The Lamb Ward is the Paediatric ward at Redland Hospital. It currently has total of 12 beds including 4 Short Stay unit beds situated on the ward. We have a dedicated treatment room for procedures. There is an extensive day case workload including Rheumatology infusions, Gastroenterology infusions, Haematology Oncology patients Endocrine Tests in addition to surgical, and dental lists. There is also a Hospital in the home service from age 5 and above</p> <p>There is a Level 4 CSCF Special Care Nursery that is funded for 10 beds. There is a separate 4 bed children's assessment area in our Emergency Department. Nearly 16,000 children are seen in our Emergency department; more than 2,000 babies are born in our hospital and nearly 4,500 patients are seen in our outpatient clinics every year.</p> <p>We have an excellent academic teaching program and are active in basic research, our research papers have been presented at the national and international conferences.</p>

# Rockhampton Hospital

<p><b>Hospital information and highlights</b></p>	<p>Rockhampton Hospital paediatric service is the referral centre for Central Queensland Hospital and Health Service. The CQHHS serves a population of 230,000 people from Emerald in the West to Yeppoon on the east and Gladstone in the South. We get patients from as far West as Longreach. About 25% of all our ED presentations are children below 16 years. Gladstone Hospital (Eight paediatricians, two fellows and two advanced trainees) takes some of our step-down patients.</p> <p>The Hospital provides a General Paediatric service with support for more complex cases from Queensland Children's Hospital (QCH) and RBWH (for newborn) as the need arises.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services</p> <p>Emergency Department (Physical presence of Paediatrics in mixed ED)</p> <p>Outreach programs</p> <ul style="list-style-type: none"> <li>• Indigenous children a. # The Prince Charles Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Prince Charles Hospital (TPCH) within the Metro North HHS is a major teaching hospital located on Brisbane's northside. Originally opened in 1954 as the Brisbane Chest Hospital, and developing as a leader in cardiothoracic services, TPCH also offers emergency, general surgical, medical and orthopaedic services.</p> <p>In 2012, TPCH opened its new Children's Health Service which includes an accredited paediatric Emergency Department, Short Stay Unit, inpatient ward and outpatient service. The Hospital serves a population of more than 75,000 children aged 0 to 16 years from Ocean View, near Dayboro, north of Brisbane, to Gordon Park in Brisbane's inner northern suburbs. There were 33,297 paediatric emergency presentations in 2021, and this number is increasing each year. Similarly, the Paediatric inpatient and outpatient occasions of service have increased as demand for local paediatric care grows. The Team works collaboratively with an experienced paediatric allied health team.</p> <p>The Hospital provides a generalist model of service with trainees managing routine and complex cases in general paediatrics on the Children's Ward, Children's Emergency Department and Paediatric Outpatient Department.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient services</p> <p>General Paediatric Outpatient and Allied Health Clinics</p> <p>Children's Emergency Department (CED)</p>
<p><b>No. of beds</b></p> <p><b>Annual paediatric admissions</b></p>	<p>For 2021:</p> <p>12 ward beds, 6 General Paediatric and 6 Short Stay Unit beds (increasing to 16 beds when demand requires, with Executive approval)</p> <p>1376 paediatric inpatients</p> <p>2764 Paediatric Short Stay Unit admissions (co-located in Children's Ward but managed by Emergency Department staff)</p> <p>4,693 Paediatric Outpatients Occasions of service (OOS) and 1600 Allied Health OOS.</p>
<p><b>No of births</b> (if applicable)</p>	<p>None (no Maternity Service or Neonatal Service)</p>

# The Townsville University Hospital

<p><b>Hospital information and highlights</b></p>	<p>As North Queensland's tertiary service, Townsville University Hospital supports a large catchment area which is home to around 700 000 people. Whilst the Children's Ward and Paediatric Intensive Care Unit attend to 3000 unwell children and adolescents a year, the hospital-based outpatient clinics offer general paediatric, paediatric surgery, and paediatric medical and surgical subspecialist care. 40% of our admitted patients are indigenous patients.</p> <p>The Hospital provides a generalist model of service with trainees managing complex cases in General Paediatrics. Subspecialty support is provided locally and via telehealth and outreach visits in specialties including respiratory, endocrine, neurology, cardiac, renal, oncology, gastroenterology, neurology and rehabilitation within the paediatric unit. Townsville is a referral centre for North Queensland providing services to children in Paediatric Surgery, ENT, Neurosurgery, Orthopaedics, and Paediatric and Neonatal Intensive Care. The medical needs of these children are coordinated and provided by the General Paediatric Service.</p> <p>Aboriginal and Torres Strait Islander children comprise a significant component of the client / patient base (20 - 30%) and outreach clinics include regular visits to the remote Indigenous community on Palm Island. Trainees are provided with cultural training and Indigenous Liaison Officers and Health Workers are part of the teams.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services</p> <p>Outreach programs to regional and remote centres (including Indigenous community)</p> <p>General Paediatric clinics</p> <p>Community Paediatrics</p> <p>Child Protection Unit (in generalist model)</p> <p>Tertiary Perinatal Neonatal Intensive Care Unit (including neonatal surgery)</p> <p>Paediatric Intensive Care Unit</p> <p>Child Youth Mental Health Service</p> <p>Local subspecialists in disciplines of endocrinology, diabetes, respiratory and sleep medicine, paediatric rehabilitation, neonatology and gastroenterology.</p> <p>Local Clinics in Endocrinology, Diabetes, Respiratory Medicine, Cardiology, Rehabilitation Medicine, Rheumatology, Neurology, Oncology, Haematology, Nephrology.</p> <p>Local Surgical services in Paediatric Surgery, Burns, ENT, Neurosurgery, Ophthalmology,</p> <p>Visiting services in major Paediatric Subspecialties</p>
<p><b>No. of beds</b></p> <p><b>Annual paediatric admissions</b></p>	<p>33 General Paediatric beds</p> <p>3,000 including PICU</p>

	<p>6 PICU beds</p> <p>16 NICU and 28 SCN beds</p> <p>Adolescent Psych inpatient unit</p>
<b>No of births (if applicable)</b>	~3,000 in Townsville
<b>RACP accreditation</b> <b>Please refer to the RACP website for up-to-date accreditation status</b>	<p>Maximum of 24 months of training</p> <p>Accredited rotations Tertiary Neonatal Care with perinatal component</p> <ul style="list-style-type: none"> <li>o Developmental and psychosocial training</li> <li>o General Paediatrics without a perinatal component (not accredited for rural)</li> <li>o Paediatric ED</li> </ul> <p>Accredited to 2027</p> <p>Maximum of 18 months of core training</p> <p>Accredited category rotations</p> <ul style="list-style-type: none"> <li>o Acute Care (NICU, PICU and ED)</li> <li>o Community/Developmental</li> <li>o General Paediatrics without a perinatal component (not accredited for rural)</li> </ul> <p>Accredited to 2027</p>
<b>Potential rotations (depending on availability)</b>	<p>General Paediatrics</p> <p>Neonatology</p> <p>Community/Developmental - Can include. Child Protection (BT), Rehabilitation (AT), Rheumatic Heart Disease and Clinical Education (AT), Child Youth Mental Health (AT). Paediatric Rehabilitation accredited for community training in General Paediatric AT or for Paediatric Rehabilitation Training</p> <p>PICU for more senior BTs</p> <p>General Paediatrics Acute Care – NICU or PICU</p> <p>Community/Developmental - Can include. Rehabilitation, Rheumatic Heart Disease, Child Mental Health, Clinical Education etc. Paediatric Rehabilitation accredited for community training in General Paediatric AT or for paediatric rehabilitation training (supported by QCH rehab unit)</p> <p>Neonatal unit provides AT training in neonatology and THHS also can support dual training in General Paediatrics and Neonatology.</p> <p>Townsville is part of QLD NPM Network. Not all these positions are fixed for advanced trainees in general paediatrics but can be organised by prior arrangement. Other options are possible depending upon trainee requirements and available positions</p>
<b>Staffing and supervision</b>	<p>Director of Paediatrics</p> <p>Director of Paediatric Education</p> <p>Paediatricians x 6.0 FTE including Directors</p> <p>Neonatologists x 5</p>

	Sub-specialists in Paediatric Rehabilitation, Endocrine and Respiratory and Sleep Medicine, Gastroenterology and soon Cardiology
<b>Teaching and learning</b>	<p>Weekly Teaching sessions (protected)</p> <p>Weekly paediatric grand rounds</p> <p>Fortnightly journal clubs and simulation training</p> <p>Daily consultant rounds</p> <p>Monthly Morbidity and Mortality meetings</p> <p>4 hours protected time for college projects or quality improvement activities for ATs</p> <p>Monthly AT support meeting with consultant paediatricians</p> <p>Encourage AT leadership training, research, education training</p>
<b>Profile of work</b>	<p><b>General Paediatric Rotation:</b></p> <p>BTs will be rostered on a rotating roster in compliance with the award requirements. ATs in the General Paediatric Service are supervised to lead the team of Basic Trainees and RMOs. BTs are responsible for ensuring appropriate assessment, admission, discharge, management, and planning for children moving into the acute service and coordinate with the ED, PICU, and community and outpatient clinics. BTs will be scheduled to attend general paediatric clinics with SMOs and will have the opportunity to attend subspecialist clinics.</p> <p>Research/presentations – Are encouraged and supported with research and quality improvement activities and to present their work.</p> <p>Teaching responsibilities - Daily bedside teaching with Medical Students and Junior Doctors on rotation to Paediatrics. Participate in Paediatric trainee teaching.</p> <p>General Paediatric Rotation: AT's in the General Paediatric Service are supervised to lead the team of junior doctors. They are responsible for ensuring appropriate assessment, admission, discharge, management and planning for children moving into the acute service and coordinate with the ED, PICU, and community and follow up services. Specialist clinic coverage – Attend 1-2 clinics per week. Research/presentations – Are encouraged and supported with research and quality improvement activities and to present their work. Teaching responsibilities - Daily bedside teaching with Medical Students and Junior Doctors on rotation to Paediatrics. Participate in Paediatric trainee teaching. Opportunities for more formal medical student teaching.</p> <p><b>Neonatal Rotation:</b></p> <p>In a Neonatal rotation the trainee is supervised by the neonatal team (5 neonatologists), participates in the NICU teaching program and has opportunity for support in research. BTs will rotate on a rotating roster and attend deliveries as required.</p>

	<p><b>Community Rotation:</b></p> <p>The trainees attend outreach clinics with a paediatrician 1-2 per month (mostly day visits, driving or flying), attend community and developmental clinics with a paediatrician 1-2 per week as well as participating in clinical activities of the Child Protection service. They also attend a local community training program (weekly), and state-wide community paediatric tele link if roster allows, and General Paediatric Grand Rounds.</p>
